

Infineon's Jochen Hanebeck Appointed New President of AENEAS

Paris, 2 January 2025 – AENEAS, the Industry Association for European nano- and microelectronics-based components, systems, and applications, today announces the appointment of **Jochen Hanebeck, Chief Executive Officer of Infineon Technologies AG**, as its new President. He succeeds Kurt Sievers, President and CEO of NXP Semiconductors, who has held the post since 2022.

"With the implementation of the European Chips Act and the Chips Joint Undertaking, the preparation of the new EU Framework for Research and Innovation, and the focus on skills development and international collaboration, the importance of microelectronics and ECS continues to grow. As AENEAS President, I am committed to ensuring that the association continues its path of success, supporting our industry and representing its best interests," said Jochen Hanebeck, sharing his vision for AENEAS.

Jochen Hanebeck has been a member of the Management Board of Infineon Technologies AG since 2016 and has been a CEO since 2022. He brings decades of experience in the microelectronics industry, where he has consistently driven innovation and collaboration across Europe and beyond.

AENEAS continues to play a central role in shaping Europe's technological leadership. By fostering ambitious RD&I initiatives, strengthening collaboration within the Electronics Components and Systems (ECS) value chain, and supporting programs like the Chips Joint Undertaking, Eureka Clusters (Xecs, PENTA, Euripides²), and future EU Framework Programs, AENEAS contributes to sustainable innovation that delivers economic, societal, and environmental impact.

About AENEAS: <https://aeneas-office.org/>

AENEAS is an Industry Association established in 2006. Its mission is to promote Research, Development, and Innovation (RD&I) to enhance the competitiveness of the European industry across the complete Electronics Components and Systems value chain. As a partner in key European initiatives, including the Chips JU and Eureka-funded Clusters, AENEAS provides networking opportunities, policy influence, and access to funding for all participants in the field of micro- and nanoelectronics-enabled components and systems.
